

# Planmeca ProX

*Intraoral imaging redefined*

*To celebrate its 40<sup>th</sup> anniversary, Planmeca is proud to introduce Planmeca ProX, a new intraoral X-ray unit. The advanced Planmeca ProX provides easy and precise positioning and optimised imaging for straightforward procedure and high-quality, high-resolution images.*

**PLANMECA**

### Exclusive features – optimised, high-quality imaging

- Any contrast and density needs can be met with variable kilovolts (50–70 kV) and milliamperes (2–7 mA).
- Integrated magnetic connector for digital Planmeca ProSensor intraoral sensors.
- New X-ray tube with 0.4 mm focal spot maximises resolution.
- Easy and quick workflow with optimised exposure values for molars, premolars, incisors, bitewings and endodontic examinations.
- With a push of a button the exposure values can be adjusted for film or digital imaging.
- With the high-frequency (66 kHz), constant-potential X-ray generator, patient dosage is reduced by more than 25% compared to conventional AC generators.
- Practical and stylish, Planmeca ProX is designed to provide easy and accurate positioning and conveys professional, high-quality image.
